/// Template REHAB projects

- Check the page and look if it is necessary to change items or not
- Work packages: you can add after discussing/proceeding in the project
- We need to decide which part should

/// OZERKDER

- It is located in Ankara
- Is providing help in 2000 special institutes, founded to help drug addicts and people with disabilities
- Until now they were focussing on the individuals, but from now on, they also want to focus more on their families
- They are working hard to prevent the problem, to solve the problem when it is there already and give their support after the problem is solved > whole process support
- It had become a very important institute in the Turkish society
- They work with a very unique and personal approach
- Family communication and harmony is their main goal, so that the victim of drugs or disability is surrounded by good people and a healthy environment

- Social and individual training is provided
 - they provide material and theoretics, but also give the training themselves
 - they have psychologists, social workers,...

DISTRIBUTION OF THE TASKS

- 2 years project
 - start: 01.09.2016
 - end: 31.08 2018
- Objective: rehabilitation and integration of drug problems in the society > individual and family approach
- What should we do?
 - develop and implement innovative training modules and other relating material
 - we will make the samples and try them out + analyse and check if there is a need for improvement and then
 - planning and design will take more time than the appliance of the materials and training
 - After the first fase (planning, data collecting, designing and first implementation) we need to come together and learn from each other's experience
- This product promotes:
 - equity
 - social inclusion
 - active citizenship
- Planning over time
 - Turkish party has made a calendar with the planning of the activities over 2y time

Check project proposals (in leaflet : implementation : from page 39) for further task division and than we can decide what the concrete task content should be. We need to check how those tasks can be done in our own country and with our own policy.

> We can do this in scheme and put keywords per task/department of the project
